RJN Group, Inc. Selected for Cincinnati MSD SSES Project

Wheaton, IL (January 13, 2010) – RJN Group, Inc. (RJN) was recently selected by the Cincinnati Metropolitan Sewer District (the District) for a multi-year Master Service Agreement (MSA) for sewer collection system design and support. RJN will be available to provide full turnkey services for investigating and designing the District's collection system upgrades. The MSA will cover a period of up to five years, through 2014. The first project assignment is the design of the Fairmont Sewer Replacement, which includes replacement design for 1,500 linear feet of combined 12-inch, 15-inch, and 18-inch sewers located in the South Branch Mill Creek sewer shed. This collection system is in need of replacement because of the infrastructure's age and significant deterioration.

RJN provides engineering consulting services for municipal, county, state, and federal infrastructure systems. The firm's offerings include the study, design, and construction management of wastewater, water, stormwater, roadways, and bridges. GIS and asset management services are also offered by the firm. RJN, established in 1975, is headquartered in Wheaton, Illinois, with offices nationwide.
