RJN Group, Inc. Performs Phase III of the City of Collinsville I/I Investigation

Wheaton, IL (November 8, 2007) – RJN Group, Inc. was recently selected for the final phase of I/I investigations to evaluate the current conditions of the sanitary collection system for the City of Collinsville as they plan an upgrade / expansion for the existing waste water treatment plant. RJN will gather data through full descent manhole inspections, smoke testing of pipe segments, and dye testing of suspected illicit connections. GPS data will also be gathered for all sanitary structures which will be used to provide a more comprehensive map of the city's collection system for future asset management. The identification of all defects will provide the city with the means of a cost effective solution of removing excess flows in the waste water collection system during wet weather. These field investigations began in 2005 and are expected to be complete in November 2007.

RJN Group, Inc. provides engineering consulting services for municipal, county, state, and federal infrastructure systems. The firm's offerings include the study, design, and construction management of wastewater, water, stormwater, roadways, and bridges. GIS and asset management services are also offered by the firm. RJN, established in 1975, is headquartered in Wheaton, Illinois with offices nationwide.
