RJN Group, Inc. Enters Partnering Agreement With Dakota Software

Wheaton, IL (January 13, 2010) – RJN Group, Inc. (RJN) recently entered into a partnering agreement with Dakota Software to provide full-spectrum environmental health and safety compliance resources to industry and public-sector clients. Dakota Software works with regulations and compliance issues, helping customers with complex data tracking, documentation, and analysis across multiple sites using flexible and intelligent software solutions, attaining superior positions in compliance, auditing, and operational efficiencies. Dakota Software gives facility managers an easy-to-use tool for capturing, filtering, and proactively addressing regulations specific to their site. By simplifying compliance at the point of control, enterprises can more-effectively integrate sustainability initiatives into the site's day-to-day operations.

In addition, RJN has the following capabilities:

- Permitting
- Spill prevention control and countermeasure plans
- Emission inventory reporting
- Greenhouse gas emission reporting
- Control technology determinations and recommendations
- Tier II reporting
- Superfund Amendments and Reauthorization Act 313 reporting
- Technological and engineering solutions to environmental issues

RJN also provides engineering consulting services for its clients and their facilities. The firm's offerings include the study, design, and construction management of wastewater, water, stormwater, roadways, and bridges. GIS and asset management services are also offered by the firm. RJN, established in 1975, is headquartered in Wheaton, Illinois, with offices nationwide.
