## **RJN Group, Inc. Evaluates Basin for the City of Fort Smith**

Wheaton, IL (July 22, 2008) – RJN Group, Inc. was recently selected to perform an evaluation of Sub-Basin 12 for the City of Fort Smith, Arkansas. The age of the system has caused plugs in the basin to deteriorate and contribute to overflows, resulting in a need for many repairs. RJN will provide an in-depth SSES study to locate the sources of inflow and infiltration (I / I). Areas of blocked cross connections will also be taken into consideration. This study will allow the City to know which areas of the basin are in need of immediate attention in the design phase. The assessment began in February 2008 and the design phase is slated to commence in January 2009.

RJN Group, Inc. provides engineering consulting services for municipal, county, state, and federal infrastructure systems. The firm's offerings include the study, design, and construction management of wastewater, water, stormwater, roadways, and bridges. GIS and asset management services are also offered by the firm. RJN, established in 1975, is headquartered in Wheaton, Illinois with offices nationwide.
