RJN Group, Inc. Provides Design Services for Godfrey's Northeast Interceptor

St. Louis, MO (September 4, 2009) – RJN Group, Inc. has been selected to provide design services for the Village of Godfrey, Illinois. Services consist of the upsizing of approximately 5,000 linear feet of aging sanitary sewer main. Development upstream of this area has increased sanitary flows. Multiple parallel, aging undersized 15-inch mains will be replaced by a single, new larger 30-inch main. Three aerial sanitary sewer creek crossings are also to be eliminated with the new design. Construction costs of the project are an estimated \$1.5 million (plus).

RJN Group, Inc. provides engineering consulting services for municipal, county, state, and federal infrastructure systems. The firm's offerings include the study, design, and construction management of wastewater, water, stormwater, roadways, and bridges. GIS and asset management services are also offered by the firm. RJN, established in 1975, is headquartered in Wheaton, Illinois with offices nationwide.
