RJN Group, Inc. Selected to Provide Sanitary Sewer System Evaluation for City of North Richland Hills, Texas

Dallas, TX (December 2, 2009) – RJN Group, Inc. was selected to perform a Sanitary Sewer System Evaluation for the City of North Richland Hills, Texas. Services will determine wastewater flow rates during dry and wet weather periods, capacity of the wastewater collection system south of Loop 820, and the condition of the system in prioritized areas. Included in those services: flow monitoring at 13 locations; flow analysis; below-ground manhole inspection of 266 manholes; capacity analysis of 90,000 feet of pipe; smoke testing; dyed water flooding; GPS survey; mapping; and a detailed report that will provide specific recommendations for any required improvements.

RJN Group, Inc. provides engineering consulting services for municipal, county, state, and federal infrastructure systems. The firm's offerings include the study, design, and construction management of wastewater, water, stormwater, roadways, and bridges. GIS and asset management services are also offered by the firm. RJN, established in 1975, is headquartered in Wheaton, Illinois with offices nationwide.
