## **RJN Group, Inc. Conducts Building Inspections for the City of Wheaton**

Wheaton, IL (August 20, 2007) – RJN Group, Inc. was recently selected to inspect various buildings for the City of Wheaton due to a concern with excess storm water in the sanitary sewer system. RJN will perform inspections at each building in selected subdivisions, which were previously identified from flow monitoring tests. The RJN field team will be in search of storm sump pumps and downspouts that are improperly connected to the sanitary system. Smoke testing will also be performed in the area to identify sewer defects and improperly connected storm structures. This inspection will address improper connections and reduce the amount of storm flow entering the sanitary sewer system. The assessment is slated to begin in July 2007.

RJN Group, Inc. provides engineering consulting services for municipal, county, state, and federal infrastructure systems. The firm's offerings include the study, design, and construction management of wastewater, water, stormwater, roadways, and bridges. GIS and asset management services are also offered by the firm. RJN, established in 1975, is headquartered in Wheaton, Illinois with offices nationwide.
